Germany study budget

Use your own figures in EUR for one clearly defined study period. This worksheet is for manual planning; it does not calculate totals automatically.

University / course: _____

Campus: _____ Budget period: _____

Months included: _____ Exchange rate (optional, INR per EUR): _____

Expense	Cost EUR	Paid EUR	Unpaid EUR
Tuition after confirmed fee discounts			
Semester contributions / mandatory fees			
Health insurance			
Housing, bills, food and local travel			
Books, equipment and personal costs			
Flights and travel			
Applications, tests, APS and visa fees			
Other costs, language prep / contingency			

Count each cost once. Deduct tuition deposits already credited, and do not subtract a scholarship again if it is already included in the tuition figure. Keep pending awards and unconfirmed earnings out of confirmed funds.

A. Total unpaid expenses above (EUR) _____

B. Refundable deposits still needed - temporary cash (EUR) _____

C. Available confirmed funds for A + B (EUR) _____

Remaining funding gap: max(0, A + B - C) (EUR) _____

For C, count only funds still available for these unpaid costs. Check approved-loan conditions and release timing. Keep a separate payment schedule. A refundable deposit is a cash need, not an additional living expense.

Check German visa financial-evidence instructions separately. Money set aside in a blocked account is not a second living-cost expense. Mark missing amounts **Not yet confirmed**.
