Ireland study budget

Use your own figures in EUR for one clearly defined study period. This worksheet is for manual planning; it does not calculate totals automatically.

University / course: _____

Campus: _____ Budget period: _____

Months included: _____ Exchange rate (optional, INR per EUR): _____

Expense	Cost EUR	Paid EUR	Unpaid EUR
Tuition after confirmed fee discounts			
Mandatory university fees			
Private medical insurance			
Housing, bills, food and local travel			
Books, equipment and personal costs			
Flights and travel			
Applications, tests, visa and registration fees			
Other costs / chosen contingency			

Count each cost once. Deduct tuition deposits already credited, and do not subtract a scholarship again if it is already included in the tuition figure. Keep pending awards and unconfirmed earnings out of confirmed funds.

A. Total unpaid expenses above (EUR) _____

B. Refundable deposits still needed - temporary cash (EUR) _____

C. Available confirmed funds for A + B (EUR) _____

Remaining funding gap: max(0, A + B - C) (EUR) _____

For C, count only funds still available for these unpaid costs. Check approved-loan conditions and release timing. Keep a separate payment schedule. A refundable deposit is a cash need, not an additional living expense.

Check Irish immigration financial-evidence instructions separately. Proof of funds is not a second expense to add to your living costs. Mark missing amounts **Not yet confirmed**.
